

Burgess Park Woodlands

Some trees and shrubs in the woodlands are evergreen, meaning they keep their leaves in the winter!

There are also some plants that grow on the woodland floor during the winter. Can you find all of the plants below?

Holly Oak

Bay

Snowdrop

Dandelion

Sticky Willy

Crocus

Burgess Park Woodlands

Some trees in the woodlands are deciduous, which means they lose their leaves in the winter!

Sometimes we can identify them by finding their fallen leaves on the woodland floor, or by examining their branches.

Can you find the following deciduous trees?

Field Maple

Hazel

Poplar

Cherry

Sycamore

Burgess Park Woodlands

Which bugs are active in the woodlands during winter?
How many can you find?
